DREAM BIG

ENGINEERING OUR WORLD

SCAN ME

See Dream Big in Las Vegas at the UNLV Science and Engineering Auditorium

Sunday, May 21st, 2017

Dream Big is a HUGE film. Literally. From the Great Wall of China and the world's tallest buildings to underwater robots, solar cars and smart, sustainable cities, Dream Big celebrates the human ingenuity behind engineering marvels big and small and reveals the heart that drives engineers to create better lives for people around the world.

Dream Big will transform students' understanding of engineering and inspire them to learn more about the "E" in STEM. But it's more than a film. Teachers have access to a variety of educational resources including an Educator Guide with 12 lesson plans for grades K-12 that align with Next Generation Science Standards (NGSS), 50 hands-on engineering activities and 10 educational videos. These resources can be found at www.DiscoverE.org/DreamBig.
